

Eurofins Environment Testing: COVID-19 - Update #2

Our Laboratories and Offices remain Open and Fully Operational in Australia & New Zealand

To all of our valued clients, I wish to advise that we are open across all of our laboratories Nationally in Melbourne, Sydney, Brisbane and Perth and our offices and warehouses remain operational in Adelaide, Darwin, Newcastle and Wollongong.

Our Logistics support partner has again reassured us today that their local and interstate overnight deliveries remain in place between all capital cities in Australia, irrespective to the closure of borders.

Our Logistics support partner operates their own aircraft fleet and it remains in place and fully operational.

I am pleased to say that it is business as usual from our perspective.

We are a support laboratory for many of our Essential Service providers and they are instructing us to remain operational to support their services in the event of any alterations in the future. As such, we are putting in place strong procedures to ensure the safety of all of our staff and continuity of our business.

I will keep you informed of any changes over the coming days and weeks – wash your hands!
